PROFESSIONAL SUMMARY

Data analyst with experience building data warehouses, automated ETL pipelines, and executive dashboards across consulting, nonprofit, and travel industries. Skilled in SQL, Python, R, and Google Apps Script, translating complex datasets into scalable reporting systems and actionable insights for decision-makers.

EDUCATION

California Polytechnic State University - San Luis Obispo **September 2021 - June 2025**
Bachelor's of Science, Statistics GPA: 3.70

- Minor: Economics
- Activities: Undergraduate Statistical Research, Statistics Club, Intramural Sports, Young Life

PROFESSIONAL EXPERIENCE

Live Oak Partners | Financial Consulting **Tulsa, OK**
Consultant/Contract Data Analyst *Oct 2025 – Present*

- Built and maintained a financial data warehouse in the Google ecosystem to process and analyze income and expense data for a national real estate association client, automating reporting across 20+ financial reports and reducing reporting time by ~70%.
- Designed automated ETL processes using Google Apps Script to clean, standardize, and produce 5 standard financial reports, ensuring data quality and consistency.
- Conduct quarterly and annual financial reconciliations for two client organizations, validating accounting records and reconciling tens of thousands of dollars in transactions across reporting systems
- Supporting a client's migration to a new inventory management platform, assisting with data structure planning, reporting workflow design, and system integration.
- Leading QuickBooks onboarding for a new client, establishing chart-of-accounts structure and financial reporting workflows to support accurate accounting and operational reporting.

Apple Leisure Group | Travel and Hospitality Conglomerate **Addison, TX**
Business Analyst Intern *June 2024 – Aug 2024*

- Analyzed emerging AI applications in the travel industry across major travel corporations, producing research used in VP-level product strategy discussions.
- Built and automated 3 Google Analytics dashboards used by marketing teams across 2 major travel brands, improving reporting efficiency and insight accessibility.
- Analyzed destination performance trends using R and statistical methods to support an SEO initiative that improved online visibility.

The People's Kitchen | Non-Profit Organization **San Luis Obispo, CA**
Consultant/Independent Study *Apr 2023 – Apr 2025*

- Designed and implemented a 5-year data pipeline using Google Scripts and Looker Studio, transforming hand-written data into a structured dataset, and enabling real-time dashboard reporting for a non-technical nonprofit team.
- Built a 5-page executive dashboard tracking daily meal service and operational trends, giving nonprofit leadership their first centralized reporting system.
- Streamlined data collection and visualization, reducing manual reporting time and empowering leadership to make data-driven operational decisions.

California Polytechnic State University Statistics Department **San Luis Obispo, CA**
Grader and Learning Assistant *Sept 2023 – June 2025*

- Evaluated coursework for 6 upper and lower-division statistics courses, ensuring accuracy and clarity in student assessments

PROJECTS & LEADERSHIP EXPERIENCE

Selected Academic Projects | My GitHub

- Applied regression, survival analysis, experimental design, and time series methods across multiple projects (e.g., Cox models, logistic regression, ANOVA) using R.
- Projects include survival modeling of tree saplings, cancer prognosis classification, and controlled experimental analysis.

Youth Philanthropy Initiative *2018-2021*
Co-Facilitator

- Co-led a $25,000 youth philanthropy initiative, facilitating meetings and allocating funds to community programs.
